

PAVER COAT

2K WATER BASED POLYURETHANE

PAVER COAT

2K WATER BASED POLYURETHANE

Sheenlac Paver coat-2K WB PU is a two pack water based Polyurethane paint for direct application over prepared concrete / cement floor and stone types. It can be used for interior & exterior applications. The product will deliver superior durability and colour retention.

RECOMMENDED USE

- 1. Residential car park / Interlock concrete block
- 2. Warehouse floor areas
- 3. Pedestrian walkways and Stairways
- 4. Terrace and vertical walls
- 5. Commercial car park area

COVERAGE*

5

Theoretical Coverage 70 Sq.ft / litre in 2 coats

PRODUCT FEATURES

- 1. Hot tyre mark resistance
- 2. High exterior durability
- 3. Self-priming
- 4. Low dirt pickup
- 5. Easy to clean

*Actual coverage may vary due to factors such as method and condition of application, surface roughness and porosity and weather conditions.

	poor	average	good	better	excellent

SURFACE PREPARATION

The surface to be applied needs to be clean and free from dirt, peeling paint and other contaminants like greasy materials and organic debris. Clean the surface using fresh water and appropriate surface cleaners.

The loosely bound paint needs to be removed using wire brushing or power tool cleaning. Any algae or fungus needs to be cleaned using house hold bleach and later wash the surface with fresh water. Any cracks and crevices needs to be filled with suitable filling compounds before application .Any dampness issues needs to be addressed appropriately before application.

After cleaning, sand the surface to remove any smoothness or glossy areas using wire brush or power tool sanding. Wash with fresh water to remove the dust, allow the surface to dry.

New concrete, masonry or plaster: The new concrete should have matured at least 30 days in ambient condition.

APPLICATION DATA

Stir the base thoroughly. Mix hardener gradually into the base under continuous stirring as per the mixing ratios. Use potable water for thinning and don't over thin the paint more than the recommended levels.

Apply a self-priming coat of Sheenlac Paver coat-2 K WB PU, by diluting with 30 - 50% water. Allow it to dry for minimum 7-8 hours (25° C / 50% RH).

Apply further coat of Sheenlac Paver coat-2 K WB PU at 10-20% dilution using standard brush, roller or spray.

One more optional coat may be apply depending on the hiding and colour requirements.

Note: Not recommended on floors where acid/alkali spillage are likely. Care should be taken when moving heavy motor vehicle, portable cranes etc. over the coated floor. Not suitable for any immersion services or water logging areas.

TECHNICAL DATA

: Clear, White & Colours Colour

: Semi Glossy Gloss / Sheen

Method of Application : Brush, Roller, Air Assisted spray

: 70 Sq.Ft per litre at 80 μ m dry film thickness Theoretical Coverage

Dry Film Thickness : Minimum 80 µm to be developed

Dry Time (25° C / 50% RH)*: To Touch: 4 Hours To walk on: min 18 Hours Wheeled Traffic: 48 hours

: 5 (Base) : 1 (Hardener) by Volume Mix ratio

Pot Life (25° C / 50% RH) : Maximum 1 Hour

*Recoat and drying period may vary under different conditions.
