

Zinc Chrome Yellow Primer

Zinc Chrome is an alkyd based, single pack anticorrosive primer recommended for protecting ferrous surfaces. It can be used for both interior and exterior metal surfaces and provides resistance to corrosive agents on ferrous substrates.

PRODUCT BENEFITS:

ANTI CORROSIVE: best in class corrosion resistant properties

SUPERIOR ADHESION: improves top coat durability while protecting the ferrous surface underneath

SUPERIOR FINISH: excellent hiding along with Superior brushability render a superior finish on to the Substrate

PRODUCT FEATURES

AVAILABLE PACK SIZES

200ml, 500ml, 1L, 4L, 20 L

FINISHES

Available Finishes are Matt

COVERAGE

Coverage: 120-130 sqft / L / coat *

*Actual coverage may vary depending upon the substrate used and method of application

Technical Data:

Drying time @ 30 °C and 60% RH	Surface Dry	Tack free	Overcoat interval
	30 minutes	2 hours	6-8 hours

Shelf Life	2 years
Flash Point	Above at 35 °C

Application method	Spray & Brushable
Thinner mixing ratio	10% for brush and 15% for spray
Recommended thinner	Enamel thinner
