THE COATING COLLECTION

RUST & LIME SCALE REMOVER

Rust & Lime Scale Remover is a liquid with a capability to penetrate; it dissolves corrosion and scale, kills bacteria.

Recommended use:

- Product is used for removal of lime, magnetite, oxide (corrosion), humus, salt and other contamination.
- Also used in piping systems, vacuum systems, heat exchangers, or in a dip-tray. The product has the same effect as acid cleansing on stainless steel. It kills bacteria in water systems. After treatment, flush the system with water until you achieve a normal pH reading. Then the painting system can be applied as per recommendations.
